- ✓ Password must contain an upper case letter
- ✓ Password must contain a number
- ✓ Password must contain at least 8 characters
- ✓ Password must contain a special character or a space
- ✓ Password must not contain a leading or trailing space

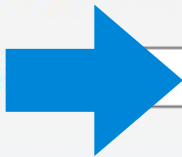

Sign up

Insert your **password** in the field and select **sign up**..

Confirm your account

We have sent a code by email to j***@g***. Enter it below to confirm your account.

Verification

Confirm account

Didn't receive a code? [Send a new code](#)

Please check your email and confirm the **verification code** sent to your email.

Choose a multi-factor authentication (MFA) method

You must configure MFA before you can sign in. Choose how you want to authenticate.

☒ **Authenticator app**
Authenticate using a code generated by an app installed on your mobile device or computer.

Continue

PLEASE select the Authenticator app.
****SMS is not available at this time

Please advise that you can install the Authenticator app from the play store or the apple store. Example(Microsoft Authenticator/Google Authenticator)

Set up authenticator app MFA

1

Install an authenticator app on your mobile device.

2

Scan this QR code with your authenticator app. Alternatively, you can manually enter a secret key in your authenticator app.

[Show secret key](#)

3

Enter a code from your authenticator app

Enter a friendly device name - optional

Sign in

Scan the QR code from your authenticator app and **enter the code** generated from the authenticator app.

Friendly Device name field is optional
